**Alfie (Darren's Border Collie) is a big fan of the traditional woodburner... "There is nothing better on a cold winters' evening than sitting yourself in front of a real fire. With so many designs to choose from, where do you start... Firecraft Fireplaces of Chorley of course!"**

**What could be better than coming home after a long day at work, pouring yourself a glass of wine and warming your toes in front of a log burning stove? Our friendly team at Firecraft Fireplaces can make that dream come true for you. From designing your perfect surround to lighting the first match, they are there every step of the way.**

Firecraft Fireplaces is a family business and has been established in Chorley since 1988 and continues to deliver a high standard of customer service and care. "We aim to give the very best advice gained from many years of experience in all aspects of the fireplace, fire and heating industry," says owner Darren. "Take into consideration the age and period of your home and the style of your décor and furniture. Then you can choose from the classic traditional to the ultra contemporary."

Such a wide range of choices are on offer, many of which are displayed in the deceptively large showroom. Each fire is set out in such a way as to make it easy to imagine it in your own home. You can choose from marble, granite, stone, cast iron and timber – all in a huge array of colours and styles.

As soon as you step into the showroom it becomes clear just how welcoming a lit fire can make a room, as well as how much heat they emit. You are then greeted by the extremely helpful staff, all of whom are experienced in the fire and heating industry and capable of answering any questions you have. Each wall is filled with every type of fireplace you could imagine. Stunning pure marble mantels encase a gas fire, sleek glass fireguards keep the coal fires under control.

The choices seem endless but luckily the knowledgeable team are on hand to narrow down the options. "We can mix and match different surrounds with different fires and hearths with our made-to-measure options, so there really is something for everyone," added Darren.

**The guidance doesn't stop at the visual effect of your new fireplace, the team are also on hand if you are thinking of upgrading your existing fire to a more energy efficient one.**

A glass fronted gas fire, for instance, significantly reduces heat loss. The team pride themselves on their complete service which includes a full survey, installation (even disposing of all the rubbish created) and total aftercare.

As engineers they offer a complete HETAS registered installation service and are GAS SAFE registered.

With a team of dedicated specialists on hand through the whole process, and the attention to detail lavished upon each hand-crafted fireplace, there are endless possibilities when creating that dream home fire.

**You are guaranteed a warm welcome, please do come in an see our extensive range of displays.**
